RE: Letter of Reference

Dear Mr. Johnson:

The City of Northglenn contracted with ECI Site Construction Management to manage the construction of the Croke Reservoir Rehabilitation Project as part of a design build team. The \$3.4 million dollar project included de-watering of the reservoir, the removal of sediment to improve fishery and wildlife habitat, the stabilization of the eastern shoreline and extension of the shoreline westward and improvements to stormwater detention in the area. Additional amenities that were added including the construction of 600 lf of a grouted sandstone rock retaining wall, extensive custom ornamental metal fence and railings, intricate landscaping, design-build water feature, custom trellis structure, extensive decorative stamped and colored concrete for the overlook node and construction of a second node for fishing and greater handicapped accessibility to the shoreline.

The City and ECI approached the construction of the project in a series of four (4) Guaranteed Maximum Price GMP contracts. Working together as a collaborative between the City of Northglenn, the engineer, and ECI allowed the design build team to continually assess the project's budget, review constructability issues and value engineer the improvements to assure that the project was able to be completed within budget and on schedule. The project was a success and achieved all of its goals.

The completion of these improvements has established Croke Reservoir as a true urban oasis. It was a pleasure working with you and your representatives and I look forward to collaborating with you on future projects.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Joliette Woodson', is written over the word 'Sincerely,'.

Joliette Woodson, P.E.
